SPECIAL ADVISORY

⚠ **Pest and disease alert**

Farmers are advised to regularly monitor citrus orchards for premature fruit drop. As very little rainfall is expected during the forecast period, check soil moisture and provide irrigation where necessary to avoid moisture stress. Apply organic mulch around tree basins to conserve soil moisture. Collect and dispose of fallen, rotten or pest-infested fruits to reduce possible sources of pest and disease infestation. Farmers should also inspect fallen fruits for signs of insect damage or disease and seek technical assistance if excessive fruit drop continues.
